SMARTBUYGLASSES

Agentic Commerce Readiness

Browser recheck

Rechecked: 18 Oct 2026 · Asia/Shanghai | www.smartbuyglasses.com | Installed Chromium

Product-level readiness remains unverified in this cloud session.

Your browser can work while a fresh cloud browser receives an automatic verification response.

Browser recheck	Products and policies	Actual AI exposure
HTTP 202 challenge	Not assessed	Not measured
Installed Chromium; TLS verification retained	No usable product or policy content obtained	This result cannot establish platform behavior

Next validation steps

Proposed work; product audit is still pending

01 Confirm catalog access

Observed: Chromium received a challenge. The validation script request failed before product content was available. [1] Official homepage

Action: Ask the merchant team to confirm a permitted catalog, product-page or data source for the review.

Owner: Ecommerce technology / security

02 Check models, sizes and lens pricing

Unverified: product descriptions, identifiers, dimensions, prices, stock and structured product data.

Action: Sample 3 products. Check model and frame dimensions with units; where relevant, identify lens options and pricing components.

Owner: Catalog team / ecommerce developer

03 Test recommendations and buying terms

Unverified: delivery, returns, custom-product terms, actual AI recommendations and referral performance.

Action: Verify purchase conditions, then test agreed shopper questions for citations, accurate matching and referral conversions.

Owner: Store operations / growth

Why your browser experience can differ

This fresh cloud browser received a challenge response, and the validation-script request was blocked by the cloud network policy. Network origin, session state or automatic browser verification may explain the difference. The specific cause is unconfirmed; this does not show that ordinary visitors cannot access the store.

Potential service: permitted catalog access + eyewear data clarity + AI recommendation and referral measurement.

Completed: homepage browser-response recheck. No usable product sample was obtained; product descriptions, price accuracy and actual AI exposure remain unassessed.

Sources: [1] Official homepage · [2] robots.txt

Method and limits: installed Chromium, a fresh context, the configured proxy and valid TLS checks; GET/HEAD requests only. Homepage: HTTP 202 with x-amzn-waf-action: challenge; validation script failed to load. No challenge bypass, product access or transaction. Findings apply only to this session.
